

Transport Impact Assessment Seminar

Wed 31 January 2018

LTA, 1 Hampshire Road S219428
Blk 8 Function Room

Organised by:

LTA ACADEMY
SINGAPORE

Learning - Research - Knowledge
To explore, inquire and share

About the Seminar

The LTA reviews the Transport Impact Assessment (TIA) Guidelines from time to time to update and enhance the processes and scope involved in assessing proposed development impacts on the road networks. With Walk, Cycle & Ride, there has been a shift in focus from being traffic centric to promoting the use of public transport. We will be sharing with you the new requirements, TIA process flow and scope that shape the new TIA Guidelines. This course will benefit consultants, transport/traffic planners, architects and developers in understanding and familiarising with the changes in the new TIA Guidelines.

LTA welcomes you to be part of our mission - "Connecting People and Places, Enhancing Travel Experience". We look forward to your registration for this training course.
