

**SIP & SIA: JOINT SEMINAR**

## **City Centre Revitalisation: Urban Waterfront**

**27 January 2005 (9.00am to 6.00pm) Furama Riverfront Hotel**

Jointly-organised by Singapore Institute of Planners & Singapore Institute of Architects as part of the continuing professional development programme.

The waterfront is an important asset of many cities. It embodies the character and history of a place. Its renewal and redevelopment is a key contemporary issue in planning with clear links to the revitalisation of the modern downtown. A new Singapore downtown is about to shape up at the New Downtown urban waterfront. This is a great challenge as well as new development opportunity. How do we harness the potential in the dynamic and collaborative practice of planning?

**City Centre Revitalisation: Urban Waterfront** presents opportunities for participants –architects, planners, developers, and all who have an interest in the urban waterfront--to explore and discuss the ideas, principles and approaches of waterfront regeneration and development. How can the waterfront revitalise and bring life to the downtown? What infrastructure and activities will be needed to make it attractive for international investment and people to enjoy?

### **Topics and Speakers**

The seminar brings together a panel of **international & local experts** and practising professionals on urban waterfront redevelopment. The overseas speakers are selected based on their experience in conceptualising, implementing, mobilising, operating & managing urban waterfronts.

- **International Urban Waterfront Experience -- Mr Richard Marshall, EDAW**
- **Singapore - Planning S'pore's Vibrant Waterfront" Mr Bernard Chan, URA**
- **Melbourne -- Mr Mark Allan, General Manager Environment & Design, VicUrban on changing face of Melbourne's new waterfront, Melbourne Docklands Precinct;**
