& CONVENTION BUREAU

Held in :

UNIQUELY  
Singapore

## ABOUT CEFPI

CEFPI is a worldwide organisation sharing knowledge, experiences and best practices in planning, designing and building learning environments that centre a community and enhance student achievement. The Australasian Region of CEFPI is a community of professionals working together to plan and build better learning environments for students throughout South East Asia, Australia and the South Pacific.

Singapore will host the CEFPI Australasia Region International Conference 2007 for the first time at Suntec Singapore International Convention & Exhibition Centre. This 2-day annual conference aims to bring together educators, academics, architects, facility planners, builders, information & communication technologists and other interested groups working to support creative and responsible planning, design, construction and renovation of schools to provide quality educational learning environments for students of all ages.

## WHAT'S IN IT FOR YOU?

As education systems develop and respond to the demands of the new knowledge society, school design is facing a number of challenges.

The key issues to be discussed / explored include:

- What are the future educational goals and how can school design best meet the needs of 21st century learners and educators?
- How can new and existing built infrastructure best accommodate increasingly diverse teaching and learning needs?
- The impact of new technology on school design
- Designing sustainable and relevant school buildings
- Designing schools in urban centres

Internationally recognised speakers will be invited to share innovative ideas. Practitioners who have initiated successful changes will present their works at this conference.

Incorporated in the conference programme are exclusive Site Visits to the latest educational facilities in Singapore.

## WHO SHOULD ATTEND?

Educators, academics, architects, facility planners, builders, information & communication technologists and other interested groups working to support the planning and provision of learning environments for all ages.
