Where a Non-Member replaces a Member (must be from the same organisation) the fee difference will have to be made good to SIA prior to the event.

SYNOPSIS

Highly Versatile Public Pool is an alternative option for the traditional concrete pool, the prefabricated pool for public swimming pool. There are many advantages on the Highly Versatile Public Pool comparing to the traditional pool, for example, it allows rapid pool installation, usually within 3 weeks, for both above and in-ground, fixed or suspended, with whatever shape and size.

With wide range of models and variable features, the Highly Versatile Public Pool allows total adaptability to any existing infrastructure, such as stadium, sport center or other venue for all manner of pool events. This system also allows fixed infrastructures to be created in any premises such as, for example, spas, hotels, condominiums, villas, aqua parks, etc.

Thelassotherapy spa center is becoming very popular among sport centers, high class condominiums and Hotels.

As a leading MNC that designs, manufactures and distribution of pool systems, Astral Pool will be introducing a new business concept that is relatively new to the spa industry. The concept covers solutions for designing and installation. The seminar will also share and update existing product ranges in the market.

Learning Objectives : The main objective of the seminar is to introduce and to bring to the awareness of the advantages of Highly Versatile Public Pools vs the traditional concrete pools AND introduction of the business concept on Thelassotherapy spa center, which is relatively new to the spa industry.

How would architects benefit from attendance? : Singapore has a big culture to water; there are pools and/or water features in nearly each building. In this seminar, the attendees will be able to learn new swimming pool concepts with high versatility and almost free from using of concrete; and the latest equipment and design trends for the thelassotherapy centers.
