Where a Non-Member replaces a Member (must be from the same organisation) the fee difference will have to be made good to SIA prior to the event.

CPD PROGRAMME

SINGAPORE INSTITUTE OF ARCHITECTS

2008/064/ms/jc

SYNOPSIS

A tiling finish is a system comprising no less than substrate, bedding, ceramic tiles (or stone veneers), grout and movement joints. All components are equally important and intimately related to one another. Adequate compatibility must exist among the components as they could only function collectively. The system could only be as strong as the weakest component, if not worse.

In summary, the talk will increase the awareness on the understanding of the different performance levels of adhesives for various applications and selecting the right adhesive with due consideration to budget and performance.

Learning Objectives:

To have a better understanding on the property, performance characteristics and use of different types of adhesives available in the market that meet industry standards.

How would architects benefit from attendance?

- To be able to make reference to the latest standards relating to performance criteria for adhesives and specify materials with due consideration to performance requirement and budget.

SPEAKER'S PROFILE

Ms Jesseline Yap
Sales & Marketing Manager (Adhesive Division)
Mapei Far East Pte Ltd

Jesseline has more than 18 years of sales and field experience on tile and stone fixing materials and related works in the construction industry. Trained in the U.S. and Italy, Jesseline is well versed in product and technical knowledge and applications for the installation of ceramic tile and stone as well as in related industry standards and practices. Jesseline obtained her business degree from the Royal Melbourne Institute of Technology, Australia, and is currently the Sales & Marketing Manager (Adhesives Division) of Mapei Far East Pte Ltd, a leading manufacturer in adhesives, sealants and construction materials.
