Attend the Creative Visual Seminar 2009 to learn how to sculpt video in thrilling ways. Perfect for media facades, unconventional shapes and other architectural applications, LED can be added anywhere you desire an artistic video effect.

Show your audience something they have never seen before and establish your facility as a landmark. Integrate LED elements into media facades, install them over domes or wrap content around structures of any shape or size. Use this product to instill the drama and excitement traditional signage fails to deliver.

Our guest speaker from Meinhardt's specialist lighting design division will discuss various lighting technology and applications which will include integration of Multiple Plasma Display Panels and LED Lighting into Architecture and the community.

Following the seminar the hosts will be available for meetings on 22 July 2009.
