

INTEGRATED LAND USE PLANNING

THE URBAN LEADERSHIP PROGRAMME

11 - 14 May 2010
Singapore

As the national planning authority of Singapore, the Urban Redevelopment Authority (URA) continually seeks to enhance our knowledge and practices on urban planning and management. The **URA Urban Leadership Programme** is part of URA's effort to share Singapore's urban planning experience, as well as to provide a platform for dialogue among cities on how to solve urban problems and improve our living environment. The programme adopts a practitioner-focused and solution-oriented approach, drawing from URA's experience and case studies.

The Integrated Land Use Planning course is a module under the URA Urban Leadership Programme. We have successfully conducted a few runs of the course last year and have received very good feedback. We will be conducting the next course from 11-14 May 2010.

By the end of the course, you will be able to:

- Understand how effective land use planning can transform a city
- Learn why integrated planning is fundamental to city growth
- Identify planning strategies that address the needs of a city
- Gain insights into mechanisms that transform ideas and plans into reality

REGISTER NOW!

Register by **14 April 2010** for an **Early Bird** discount at \$2461 per participant!

Registration will close on 28 April 2010

COURSE OUTLINE

Singapore in Perspective

- Urban challenges faced in its early years
- Planning system to address these challenges

Planning for Development

- Long term strategic planning: principles and strategies
- Detailed local plans to guide development

Transport Planning

(conducted by the Land Transport Authority)

- Integration of transport and land use planning
- Efficient transport network with integrated transport infrastructure
- Private and public transport policy considerations

From Planning to Implementation

- Tools to transform planning visions and ideas into reality
- Implementation of plans through the Government Land Sales Programme
- Quality and orderly development through development control

First-Hand Experience

- Visit the Singapore River: An example of a successful rejuvenation project
- Tour the Singapore City Gallery that houses exhibits capturing Singapore's planning efforts in a nutshell

WHO SHOULD ATTEND

Government officials, policy makers, planners, architects, professionals and practitioners in related disciplines.

With a dynamic economy, and a high quality living and business-friendly environment, Singapore is one of the most liveable cities in the world. Singapore's physical transformation into a distinctive global city took four decades of detailed and deliberate urban planning and careful implementation.

The **Urban Redevelopment Authority (URA)** plays a major role in this successful transformation. Integrating multiple functions, the URA is Singapore's national land use planning authority, the conservation authority, the key government land sales agent, champion of architecture and urban design excellence as well as the implementer of major urban growth areas.
