

The Autopoiesis of Architecture

By Patrik Schumacher, Zaha Hadid Architects

Patrik Schumacher will present Volume 1 of his two-volume treatise “The Autopoiesis of Architecture”, a unified theoretical system that is able to integrate many partial theories: a theory of architecture’s societal function, a theory the discipline’s self- demarcation, a theory of the avant-garde, aesthetic theory, media theory, process theory etc. The theory has been elaborated on the basis of a comprehensive discourse analysis of the discipline. Architecture is theorized as self-regulating system of communications comprising artefacts, knowledges, and practices all understood as communications that connect to each other in an ongoing recursive network.
