SYNOPSIS

This presentation will highlight the following:

- the two components of timber certification (forest management certification and chain of custody certification).
- the requirements of the forest management standard (environmental, social and economic aspects) as well as the chain of custody standard.
- Understanding the nature of wood
- Bio-deterioration of Wood
- Bits and pieces of Termites

SPEAKERS PROFILE

CHEW LYE TENG

Mr. Chew was appointed as the Chief Executive Officer of the Malaysian Timber Certification Council, Malaysia (MTCC) in 1999. MTCC is the independent organisation which is operating the national timber certification scheme, i.e. the Malaysian Timber Certification Scheme (MTCS).

Mr. Chew was previously attached to the Malaysian Timber Industry Board (MTIB) from 1974 to 1998 where he served in various capacities, including Director of the Technical Services Division as well as the Development Division, prior to his appointment as CEO of MTCC.

He has a Bachelor of Science (Honours) and Diploma in Education from University Malaya and a Masters in Business Administration from the International Management Centres Multinational, Buckingham, United Kingdom.

In his long service with the MTIB, Mr. Chew dealt with various technical aspects of the utilisation of timber, such as wood identification, timber grading, manufacture and quality control of timber products, wood drying and preservation, wood finishing, furniture design and manufacture, as well as in conducting various training programmes.

Mr. Chew is the founding CEO of the MTCC, having led the MTCC through its difficult initial years and gradually gaining market acceptance for the MTCC, and its scheme, the Malaysian Timber Certification Scheme (MTCS), especially since its endorsement by the PEFC Council.

Dr Wong is a graduate of the University of New England in Australia, and obtained his doctorate from the University of Tokyo. Upon graduation, Dr Wong joined the Forest Research Institute Malaysia as a Research Officer. In this capacity he published widely, including the now standard reference on Malaysian timbers, "A Dictionary of Malaysian Timbers".

In 1986, he joined the Forestry Department of Brunei Darussalam, where he was tasked with the responsibility for the reviving of the timber industry in the country. To this end, he introduced appropriate technology to stimulate the industry, organised a quality assurance scheme, and set up a quality control laboratory for treated products.

In 1988, he was elevated to the post of Senior Forestry Officer and his duties increased to cover the planning of strategies for the Department. He was involved in the preparation of the National Forestry Policy, the Strategic Plan for Forestry and the future development of the timber industry in Brunei.

DR WONG TUCK MENG

After a successful stint in Brunei, he joined the Malaysian Timber Council in 2004 and is currently the Director of the Timber Industry Development Division.
