7.00pm	Presentation by Mr Arthur Loh
7.30pm	Presentation by Mr Samuel Lim
8.30pm	Questions & Answers
9.00pm	End

*SIA Member	Complimentary
BOA Registered Architects/	S\$ 35.00
CIJC Member	
Non-Member	S\$ 45.00

Registration on First-Come-First-Serve Basis

BOA-SIA CPD Accreditation **4 points**

SYNOPSIS

To provide insights of the critical factors in ensuring effective waterproofing of buildings in Singapore

The high rainfall intensity, humidity and high water table in Singapore present unique challenges in waterproofing a building, from underground to the rooftop. Poor waterproofing will lead to high total lifecycle cost of a property, and in some cases, legal proceedings.

Successful waterproofing involves three critical factors: (1) careful design and specification, (2) technically sound product, and (3) impeccable application. Through the sharing of their experience, the presenters will provide insights and perspectives on these three factors. With almost 40 years of experience, Mr. Arthur Loh will first share his thoughts and insights on the key areas an architect must pay attention to when detailing and specifying the waterproofing requirements of a project. Mr. Samuel Lim will then present the product solutions available for these waterproofing requirements and the importance of proper application by contractors.

SPEAKERS PROFILE

ARTHUR LOH (Consultant, DP Architects Pte Ltd)

Arthur Loh is a member of the Singapore Institute of Architect and has been in practice as an architect in Singapore for almost 40 years.

He is currently a Consultant with DP Architects involved with design development and technical matters related to the appropriate use of building materials and the incorporation of good and effective details.

He believes in a holistic approach to the appreciation of architecture and thinks that the final realisation of a good building besides being spatially engaging and visually awe-inspiring should also include being well-built and functioning effectively.

Having a building that is watertight is a fundamental requirement. The understanding and application of waterproofing systems in a building is therefore essential knowledge and should be treated as such by any architectural practice.

SAMUEL LIM (Director (Waterproofing), Elmich Pte Ltd)

Samuel is currently Director of Waterproofing Division in Elmich. He has over 15 years of experience in the building industry, with the last ten years specializing in waterproofing product marketing and sales.
