 Institute of
 Architects

SYNOPSIS

The incompatibility of green lighting and design aesthetics is now a thing of the past. Given the plethora of green technology available today, green lighting design can now complement and even enhance architectural design. In this seminar by IEQ Global/EcoLight Design Consultants, architects will discover the different types of energy efficient lights available in the market today. Ranging from indoor to outdoor lighting, participants will walk away with a comprehensive understanding about the type of energy efficient lighting suitable for different purposes. As a testament to the harmony of energy efficient lighting and architecture integrity, the presentation will also feature case studies from residential and commercial developments.

Replete with case studies and on site technology demonstrations, this interactive seminar will enable architects to get up close and familiar with green lighting.

Presentation Topics

1. Design Philosophy
2. The Truth About Induction
3. The Ever Popular LED
4. Plasma, The New Kid on the Block
5. Ambience Forming Lights
6. Green Mark Certification

SPEAKER'S PROFILE

Frederick Tong

Technical Director

A Mechanical and Production Engineer by training, Frederick has over 20 years of professional experience in the field of Eco-friendly product design, technology evaluation and Green ventures. An advocate of renewable energy and energy efficient solutions, Frederick is active in fields of zero emission vehicle technology, CO2 reduction programs, Green city transportation, bio-fuel and fuel additive technology, clean energy power generation and energy efficient illumination technologies.

Lee Hyo Yeol

Design Director

In the energy and power sector since 1996, HY has been instrumental in the development of lighting applications using LED and induction technologies in the region. Having worked with leading Korean companies such as Samsung LG and Seoul Semiconductor since 2005, HY was a pioneer in developing the T8 to T5 lamp conversion technology in Singapore. Prior to his current portfolio, HY has spent the past 10 years in the industrial plant management, engineering and building materials sectors.
