7.00pm Presentation by Mr Arthur Loh, DP Architects
7.30pm Presentation by Mr Ryan Lee, Elmich
8.30pm Questions & Answers
9.00pm End

***SIA Member** Complimentary
Non Member (eg BOA/CIJC) S\$ 45.00

Registration on First-Come-First-Serve Basis

BOA-SIA CPD Accreditation 4 points

SYNOPSIS

The high rainfall intensity, humidity and high water table in Singapore present unique challenges in waterproofing a building, from underground to the rooftop. Poor waterproofing will lead to high total lifecycle cost of a property, and in some cases, legal proceedings as in the Emery Point lawsuit early this year.

Successful waterproofing involves three critical factors: (1) careful design and specification, (2) technically sound product, and (3) impeccable application. Through the sharing of their experience, the presenters will provide insights and perspectives on these three factors. With almost 40 years of experience, Mr. Arthur Loh will first share his thoughts and insights on the key areas an architect must pay attention to when detailing and specifying the waterproofing requirements of a project. Mr. Ryan Lee will then present the product solutions available for these waterproofing requirements and the importance of proper application by contractors.

SPEAKER PROFILE

ARTHUR LOH, Consultant, DP Architects Pte Ltd

Arthur Loh is a member of the Singapore Institute of Architect and has been in practice as an architect in Singapore for almost 40 years. He is currently a Consultant with DP Architects involved with design development and technical matters related to the appropriate use of building materials and the incorporation of good and effective details. He believes in a holistic approach to the appreciation of architecture and thinks that the final realisation of a good building besides being spatially engaging and visually awe-inspiring should also include being well-built and functioning effectively. Having a building that is watertight is a fundamental requirement. The understanding and application of waterproofing systems in a building is therefore essential knowledge and should be treated as such by any architectural practice.

RYAN LEE, Director, Elmich Pte Ltd

Ryan is a mechanical engineer by training and has worked in the marine and building sectors for more than 18 years. He is also a LEED AP and prior to joining Elmich in 2010, he attended the Sloan Fellowship Programme at London Business School.

Since its establishment as a waterproofing and drainage material specialist in 1985, Elmich has worked with architecture firms and consultancies to review and provide advice on waterproofing specifications for projects in Singapore and overseas. Key projects in Singapore include the Esplanade, Vivocity, Khoo Teck Puat Hospital, Tan Tock Seng Hospital, KK Hospital, Mount Elizabeth Novena Hospital, Republic Polytechnic, Resorts World Sentosa and Marina Bay Sands. Overseas projects include the Dubai Mall, KL International Airport and Yangon International Airport.

CPD PROGRAMME

SINGAPORE INSTITUTE OF ARCHITECTS

2012/069/MS/JT

Effective Waterproofing of Buildings

- 06 September 2012, Thursday
- 7.00pm – 9.00pm
- SIA Theatrette-Level 1 (79 Neil Road)
