SPEAKER

Soon Lay Kuan has the experience in training and guiding both the architecture firms and institutes of higher learning in their BIM adoption journey. She is also spearheading the project in BCA to help the industry to transit from 2D CAD to 3D BIM e-submission for regulatory approval through CORENET. Lay Kuan is currently the Assistant Director of the Centre for Construction IT.

Paul Andaya is the BIM Consultant for AEC, Crown Systems Singapore. He is mainly involved in providing BIM implementations and consulting services to clients in the Architectural, Engineering and Construction Industry. This includes helping clients develop their modeling processes and standards, through providing industry experience and sharing best practices in Revit modeling and library creation. Paul has been involved in key projects with major companies like Main Contractors and large Architectural firms. Prior to this, Paul has worked for Chevron as a Cost Engineer/CAD Designer. Paul has been using various 3D CAD technologies since the start of his career.

Ben Thum is the self-titled Innovation Director of SIACAD Pte Ltd, a commercial arm of the Singapore Institute of Architects. He graduated as an architect from University Technology Malaysia. After practising for 5 years, he decided to pursue his passion for software development. He spent 15 years in software development, experimenting with various aspects of IT ranging from assembly code programming to non-linear digital video editing.

Besides hardcore programming, Ben is actively involved in training which he believes is an excellent source for ideas and inspiration. When time permits, he will head off to his eco-sustainable hut an hour away from Singapore. Away from the grid and powered by solar energy, he finds the rural environment more conducive for working on new algorithms for the next big software upgrade or experimenting with new ways of growing food and raising livestock.
