

SIA Professional Knowledge Series: Design Safety, Specification and the Architecture Ironmongery Connection

Architectural Ironmongery often seems straightforward, accounting for a small percentage of total construction costs. It can consequently be overlooked in the design process. As experienced specifiers will know however, the wrong product selection can result in a disproportionate amount of problems during project completion, building compliance issues, and high maintenance costs for end-users.

As the primary point of contact between the building and its users, the ironmongery is integral to how a building operates and is a critical element of the design in important areas such as life safety and accessibility. In addition, correct specification can help achieve a welcome balance between the sometimes competing demands of form vs. function, safety vs. security and durability vs. value.

A wide range of National and International Standards exist for various product categories including hinges, locksets and door controls to assist specifiers in product specification and quality control. In the absence of a unified international standard however, much of the information can seem confusing.

This seminar will provide Architects and Specifiers with valuable insights into the essential features of European Standards (EN) and American National Standards Institute (ANSI) Standards, explain the similarities and key differences between the two, and discuss how the ironmongery specified can help make a building safe, accessible and compliant.

Mr. Wayne Pannell has more than 25 years' experience in the manufacture, specification and distribution of door hardware in Europe and Asia-Pacific. He has been based in Asia since 1995 and has held a number of roles including Country Manager for China, Regional General Manager for North Asia, Managing Director of Australia & New Zealand, and Managing Director for South Asia. Mr. Pannell holds a Diploma awarded by the UK's Guild of Architecture Ironmongers.

Mr. Denny Wong has more than 20 years' experience in the door hardware industry with different roles of sales & marketing, trainer, project management and consultant in China, North Asia and South East Asia regions. He is a qualified Architectural Hardware Consultant certified by Door & Hardware Institute (DHI) of USA, and is Vice President of DHI-Greater China Chapter.

Mr. Raymond Chong has more than 20 years' of experience in the door hardware and security automation industries. He is experienced across project management, technical advisor services and sales. His strong background and knowledge enables him to be an expert in architectural hardware specification across many different applications including commercial, residential and public buildings.
