

SIA Professional Knowledge Series: Tower Shaped Car Parking System

"Tower-Shaped Car Parking System" has been continuously innovating and evolving for more than 30 years in Japan in order to provide one of most effective solutions for car park space saving in all major Japanese cities.

Recently the rapid population growth and urban development in Singapore are causing a serious car park shortage. However, the current environment of car parking in Singapore won't be exactly ideal in near future and the car park planning in design stage might be still overlooked sometimes. The basic knowledge and precise understanding on Tower-shaped Car Park System in this seminar will contribute the freedom to design for architects and will improve the quality of urban city environment in Singapore.
