

SIA Experiential Visit: NEA Incineration Plants

Incineration plants are also known as waste-to-energy (WTE) plants. The heat from the combustion process is used to generate superheated steam in boilers. The steam is in turn used to drive turbogenerators to produce electricity.

This Visitation to Senoko Waste-To-Energy Plant will cover:

Session I

Briefing and Video Show – Conference Room (25 mins)

Overview on solid waste incineration process of the plant

Session II

Sight/Smell Tour (35 mins)

Visitors will get to see and have a close-up encounter at the following places:

- a) Refuse Crane Control Room - To view the feeding of refuse into the hopper*
- b) Central Control Room – Explore the nerve centre of the Plant to better understand the control and monitoring of the equipment and processes in the plant*
- c) Conference Room - Return to the foyer outside Conference Room to view photographs of the plant during its construction stage and followed by Q&A session in the conference room.*

Things to note:

- 1) Visitors must be above 21 years old.*
- 2) Visitors are not allowed to drive to the Plant on their own.*
- 3) Visitors will need to complete a **NEA's Indemnity Form** (form will be provided by SIA upon confirmation of your registration).*
- 4) Visitors are required to bring their **NRIC on the actual day of visit for NEA's verification purposes.***
- 5) For safety reason, visitors are required to wear long pants and covered shoes. **Failing to do so, the plant officer has the right not to allow you to join the tour.***
- 6) **Photography is not allowed in all areas of the Plant.***
