

SIA Event: All in the Layer

Synopsis:

Keeping the rain and haze out has always been a frustration to C-class wards in hospitals, alongside typical criteria such as maintaining good ventilation to achieve thermal comfort and minimizing glare for visual comfort.

The speakers shall present on an innovative facade system integrated with sun-shading elements and greenery, proposed as a new model typology and to spark sentiments on facades designed particularly for Singapore's Tropical Climate.

Speakers' Profile:

Cheong Yew Kee, Senior Vice President of CPG Consultants, Singapore

Yew Kee is a Sustainable Design Architect dedicated to integrating technology and art into sustainable design solutions. His portfolio celebrates a broad expertise in projects in the fields of master planning, residential, cultural institutions, and resorts in Singapore, China, India and Malaysia.

Yew Kee began his journey in sustainability, as a team member of an American architectural firm, working on the LadyBird Johnson National Wildflower Research Center project in Austin, Texas, USA, a 2000 AIA/COTE Top 10 Green award project.

Yew Kee is a registered architect with the Singapore Board of Architects, and a licensed architect in the USA. In addition, he is a current Council Member of the Singapore Institute of Architects (SIA). He chaired the SIA Sustainability Committee from 2008 to 2014. He was part of the Singapore Building and Construction Authority (BCA) GreenMark Advisory Committee and chaired the Singapore Green Building Council's Taskforce for Finishes. Yew Kee was vice-chair for the ARCASIA Committee on Green Sustainability.

Prior to this, he is the founding principal of 2B ARCHITECTS.

Student Team: Timothy Lum, Ng Yi Jin, Mak Yiing Huey, Alexandra Lee, Nguyen Minh Chau Timothy, were a team of students in the SUTD Capstone Project. A capstone project is an industry-based, multi-disciplinary project for senior-year students to apply the design principles, concepts and techniques they have learned to solve real-world problems. The team were brought together from different pillars in SUTD to work in a design team, contributing their respective expertise and skills to solve real-world challenges.

The student panel will present the results of their research relating to Smart Kinetic Façade for a Tropical Building in Singapore.
