

How perception of space changes because of large size panels (a world of possibilities!)

What does a new large-size material/surface need to perform better according to so many outdoor-indoor short-term changing environments?

Façades, outdoor pavements, indoor floorings, staircases, bathrooms and many details can be designed in a new way according to state-of-the-art technologies.

Changes on architectural rules in every country. But they follow a common 'Vitruvio' and also 'Modern' language: the bigger (Utilitas), the stronger (Firmitas) and the nicer (Venustas)... the better!

With the actual worldwide projects done with the new type of material/surface (Ultracompact Surface), the seminar is showing how the well-known and also the anonymous architects decided to 'bend the rules' and go into this new era.

JC Aranaz

Architect since 1991, University of Seville (Spain).

Previous experience in multinational companies:

- Wavin Group (all kind of plastic pipe installations). Product Manager. 1993 - 1999 (6 years)
