Organized by:

CPD PROGRAMME: 2016/045/MS/JT

GST REG. NO.: M9-0001281-J
G.N. No. 565 in Gazette No. 27

1st Presentation Topic “Understanding SCDF Circulars and its Implications”

Mdm Eng Yew Hoon – Principal Architect of EZY Architects

Profile:

Mdm Eng is the principal architect of EZY architects and a Registered Inspector. She has been actively involved in SIA Regulation Codes & Standards Committee since 1993.

Over the years, she has been representing SIA in many different committees and involved in revision of various Codes such as Code of Practice for pollution control, revision of Building Control Regulations, CP26, CP72, CP1, revision of Fire 2002, 2007, the latest release of Fire Code 2013 and Fire Safety In Rapid Transit Systems released in 2012.

Mdm Eng is currently the Deputy Chairperson of SIA- Fire Safety & Security Sub-Committee.

She is currently nominated to represent SIA in FSSD Audit Inquiry Committee, and Fire Code Review Committee to review both Fire Code 2013 and SFSRTS.

She has been appointed by Ministry Of Home Affairs as the Chairperson of the Fire Safety Appeals Advisory Board since 2012.

Mdm Eng’s contribution to the fire safety standard in Singapore was recognised by SCDF, she was awarded "SCDF Star Customer Award 2012" and conferred the Public Service Medal (PBM) in 2013.

Synopsis:

After the release of Fire Code 2013, SCDF has also issued many Circulars to the building industry since then.

*All QPs and building professionals ought to access SCDF web site and update themselves on the Circulars issued by SCDF. **What if** QPs forget to check or are not aware that SCDF has issued certain Circulars? How important are these Circulars? What are the implications if QPs missed it? Do QPs and building professionals have problem in interpreting the Circulars? We will answer all the above questions in this seminar and go through or explain the important Circulars in case you have missed it.*

2nd Presentation Topic “Sharing of Non-Compliance Cases on Different Purpose Groups”
Mr Markus Cheng – Associate Partner of ADDP Architects LLP

Profile:

An Associate Partner of ADDP ARCHITECTS LLP. He has obtained his Bachelor of Architecture degree from Curtin University of Technology in 1995. He is committee member of SIA-Fire Safety & Security Sub-committee since 2008.

Synopsis:

The presentation will focus on some of the common non-compliance cases that have been observed during waiver appeals and FSSD audit cases for the different purpose groups. These cases will provide some insight of fire safety non-compliance that commonly overlooked, misunderstood or misinterpreted by QPs and building professionals.

3rd Presentation Topic “Sharing of Non-Compliance Cases by Registered Inspector (Architectural)”
Mr Chan Yip Seng – Principal Architect of Easton Design International

Profile:

Chan Yip Seng is the Principal Architect of Easton Design International since 2000 and a Registered Inspector(RI) (Architectural). He obtained his Bachelor of Architecture degree from the National University of Singapore in 1991. Mr Chan has been a member of Fire Safety & Security Sub-Committee since 2006. He is also a lecturer for the SCDF RI Course, SIA representative to the FSSD waiver weekly meetings, member of SCDF RI Selection Panel and member of SCDF RI Inquiry Committee.

He is also an Associate Mediator of Singapore Mediation Centre at Supreme Court. He has done many court mediation sessions for State Court, SMC and the Syariah Court of Singapore as well as an in-house Mediator appointed directly by State Courts.

As a practicing RI (Architectural), he has the privileged to be in a RI team for the prestigious Marina Bay Sands project. With his involvements in various committees in SIA and Inquiry panel in SCDF, Mr Chan has gained a lot of practical experiences and knowledge in the many challenges faced by QP and RI in complying with Fire Code.

Synopsis:

Registered Inspector (Arch)'s scope of works are often done in a hurry in a project completion phase but the actual processes are more complicated and time consuming than we usually thought. Many QP are caught by the surprises of non-compliances highlighted by the RI. The project QP will be burdened to regularise any non-compliances found on plan and on site. Some non-compliance cases can be settled with additional time and cost but some required re-designing the whole layout. What are the common non-compliances? What are the roles and responsibilities of RI? What are the consequences of non-compliances? We will share our experiences on the above with real life examples of non-compliance cases.
