

SIA Professional Knowledge Series: Waterproofing For Below Ground Structures (2 CPD Points)

SYNOPSIS

Waterproofing of below ground structures such as basements and tunnels is critical due to the need to protect the underlying structure, as well as assets and people within the structure. Architects and engineers need to work together to ensure that the below ground waterproofing system is optimally specified to serve this critical need.

In this seminar, participants will:

- Better understand BS 8102:2009 Code of practice for protection of below ground structures against water from the ground
- Learn what is important when specifying, designing and constructing below ground structures
- Learn how to develop a good specification

Jointly Organized by:

SPEAKER'S PROFILE

Mr. Eugene Ang
Senior Manager,
Waterproofing Business
Elmich Pte Ltd

Eugene is responsible for the expansion of the waterproofing business across the Asia Pacific region. With a remarkable 13 years of experience under his belt, he is well versed in business management, specialising in the building and construction industry.

Leading a team of waterproofing specification specialists, Eugene is involved with several major projects around the region working closely with architects, consultants, engineers, contractors and builders.

He brings along his diversified knowledge in the fields of waterproofing and drainage protection, green building components, ready-mix concrete and admixtures as well as M&E installations to Elmich, value-adding to the organisation's rapid growth.

Eugene was also a speaker at the Singapore Institute of Architects seminar for topics relating to Waterproofing and Drainage Protection for 2 consecutive years.
