

SIA Event: Need for effective and efficient specifications

Being effective AND being efficient for door opening solutions as there are "No size fits all" solutions. Future lies in empowering architects to specify better, easier and faster both in 2D and 3D spaces.

Every door in a building serves a specific use. The complexity arises especially when its use for multiple purposes. Hence the ironmongery needs to be robust, secure and adaptive. Specific building types needs tailored made solutions. Effective specifications by experts is the answer.

The complexity of specifications needs standardization and simplification, especially, in the hands of specifiers to make it more efficient. This can be solved through advance specification software which are built on providing products which adheres to codes and standards and are verticalized providing "plug & play" experience to the user.
