

Winning Design Philosophies & New Typologies of High Rise Living

Ms Pearl Chee, WOHA Architects Pte Ltd
Project: SkyVille @ Dawson

Pearl Chee is a senior associate with WOHA, a regional design practice based in Singapore.

She graduated with a Bachelor of Architecture from the School of Architecture, National University of Singapore. Pearl is a member of both the Board of Architects and the Singapore Institute of Architects. Her portfolio with WOHA covers design execution and contract management of a range of innovative and award winning projects which includes luxury condominium, high density public housing and public projects.

Ms Sim Choon Heok, WOHA Architects Pte Ltd
Project: PARKROYAL on Pickering, SINGAPORE

Sim Choon Heok has been associated with WOHA for the past 16 years. Choon Heok first joined WOHA as an Architectural Designer in 2000 before being promoted to an Associate in 2004. A Senior Associate at present, she completed her Bachelor of Architecture in 1997 at the National University of Singapore. Choon

Heok's portfolio with WOHA encompasses design and project management of a number of seminal works in Singapore. She is currently running a few large residential developments in India, a mixed-use commercial development in Shenzhen, China and the upcoming BRAC University in Dhaka, Bangladesh.

Mr Melvin Tan, LAUD Architects Pte Ltd
Project: Philips APAC Center

Melvin H J Tan is one of four founding partners of LAUD Architects Pte Ltd. The firm was established in 2004 and has received numerous awards, including the prestigious President's Design Award 2015 and SIA Design Awards. LAUD projects have also been featured on the shortlist of World Architecture Festival, consecutively since 2013.

Melvin's design approach is one of inclusion and collaboration; that design takes on meaning when it is positioned as a response to a need. His built works span a variety of scales and types. Some notable projects include Singapore Life Church (2013), Oxley Residence (2014) and Philips APAC Center (2016).

EVENT DETAILS

- Date : 3 May 2017, Wednesday
- Time : 2.30pm - 5.00pm
(Registration will start from 2.00pm onwards with light refreshment)
- Venue : Singapore Institute of Architects

Project: SkyVille @ Dawson

SkyVille @ Dawson, Singapore is a public housing project of 960 homes completed in 2015 for the Housing & Development Board of Singapore. The themes of the project are community living, variety and sustainability and it demonstrates that high density can be high amenity.

Building communities is a core aspiration for the public housing program in Singapore but the traditional form of modern high-rises is not conducive for social interaction. The central innovation is the public, external, shared spaces interwoven through the cluster of towers from the ground to the roof. Each home is part of a Sky Village comprising 80 homes sharing a sheltered community garden terrace. 4 vertically-stacked Sky Villages across 3 interconnected blocks giving a total of 12 villages.

The apartments are designed as column-free, beam-free flexible apartment layouts, and make allowance for diverse family sizes, various lifestyles and future flexibility.

Ms Sim Choon Heok, WOHA Architects Pte Ltd

Project: PARKROYAL on Pickering, SINGAPORE

Fronting Singapore's Hong Lim Park, this Platinum-Greenmark hotel and office development demonstrates that increased density can come with an increase in amenity. The building form contrasts modernist orthogonal forms with a romantic abstracted contoured landscape. The contour expression creates a series of planted terraces on the upper surfaces, and Chinese-grotto inspired spaces below. Further layers of the contours continue up the towers, acting as huge sunshade louvres.

The top of the podium is a romantic landscape that covers the entire site, and features "Birdcage" pavilions that hang out over the street. The room blocks, organised as an E shape, support hanging gardens between them, giving foreground interest to the views over the park. The room blocks have detached, naturally ventilated corridors which are flanked by water and gardens on the exterior side, and a green wall against the rooms. At the top of the building, planted roof terraces give great views over the city.

Mr Melvin Tan, LAUD Architects Pte Ltd

Project: Philips APAC Center

The Philips APAC Center (Regional Headquarters) is a 6-Storey Industrial Building in Toa Payoh that serves as a hub for innovation and digital healthcare services; as well as the regional center for Philips operations.

It is built on the foundations of the old Philips building yet incorporates the most current workplace innovation designs that foster open collaboration, and co-creation.

Instead of submitting to the stereotypical concept of an industrial building, we envisioned the various business units in Philips coming together in collaboration; a flexible space that would meet the needs of a corporate workplace as well as with built in ability to adapt to the users over time.

The careful placement of atriums, open stairs and collaborative spaces celebrates the most active people places – located around the edge of this central heart are dynamic places – places for collaboration and meeting people – both accidentally and deliberately. Circulation paths thread through the key activity zones in a way that both efficiently moves people through the building whilst maximizing opportunities to connect.

Application Form

EVENT DETAIL

GST REG. NO.: M9-0001281-J
G.N. No. 565 in Gazette No. 27

Seminar : Winning Design Philosophies & New Typologies of High Rise Living
