10:00–12:00  
URA Function Hall

Networking & Registration  
from 9:30 – 10:00

Free Admission  
Register **HERE**

Shanghai has transformed into a liveable city where past and present thrive. How has Shanghai achieved this, and what principles will guide its future development? Drawing on the experience of the past 30 years of urban development, and using illustrative examples, such as the Hengshan -Fuxing Road Historical Cultural Area, Waitanyuan Blocks on the Bund and Tianzifang Community, the lecture will bring to light how the city has balanced the needs of urban regeneration and heritage conservation. Looking forward, regeneration, preservation and innovation will continue to be key drivers of urban organic growth necessitating cooperation and negotiation between government, the private and public sectors.

Speaker

**Dr Wang Lin**  
Professor,  
Architecture Department,  
Design School,  
Shanghai Jiao Tong University

Wang Lin is a Professor in the Architecture Department at Shanghai Jiao Tong University, a researcher of China Urban Governance Institute, and the Director of the Center for Urban Studies focusing on regeneration, preservation and innovation of cities. She has played key roles in urban planning, including the Master Planning of Shanghai, strategy planning of the Shanghai metropolitan area and the redevelopment of Shanghai waterfronts and conservation planning of Shanghai historical areas.

Moderator

**Mr Kelvin Ang**  
Director,  
Conservation Department  
(Conservation Management),  
Urban Redevelopment Authority

Mr Kelvin Ang has over a decade of experience in architecture and conservation at the URA. URA is Singapore's national planning, land use and building conservation authority. He has led a multi-disciplinary team to deliver several conservation projects including the gazette of over 700 buildings since 2003. His portfolio includes public education and partnership programmes, overseeing Place Management efforts and enforcement work.

This lecture is co-organised by:
